

Vjaceslavs Marmiss

Senior Software Engineer

Berlin, Germany | +49 176 414 87858 | vjaceslavs@marmiss.de | LinkedIn | marmiss.de

Senior Software Engineer with 5+ years of professional experience building production systems with PHP, Symfony, Vue.js and MySQL. Focused on product ownership, reusable frontend foundations, performance and maintainable business-critical features. Experienced in reporting and admin tooling, complex data tables, Excel import/export, dynamic email templates and SSO-related product work. Additional hands-on experience with Kubernetes, Terraform, HashiCorp Vault, event-driven microservices, Docker and AI-assisted engineering workflows.

SELECTED IMPACT

Reusable Product Systems

Built 50+ reusable components and UI foundations for Vue.js and Symfony product work.

Client-facing Workflows

Delivered product workflows used across a platform serving 100+ client organizations.

Data-heavy Interfaces

Created generic data tables, filters, sorting, charts, reports and Excel import/export flows.

Performance & Automation

Improved query response time, chunk loading and production interface performance; built dynamic email templates.

SELECTED PRODUCT WORK

Content Operations Platform

Laravel · Vue 3 · Node.js · Kubernetes · HashiCorp Vault · Terraform · RabbitMQ · Kafka · PostgreSQL

- Event-driven content platform with Laravel microservices, Vue 3 SPA and a headless Playwright renderer on Kubernetes.
- Infrastructure as Code with Terraform, secrets management via HashiCorp Vault, observability via OpenTelemetry.
- PHPStan level 8, full E2E coverage, RabbitMQ/Kafka event bus and n8n workflow automation.

Mobile Ad-Tech Application

Personal product project · Ionic · Laravel · MySQL

- Mobile app with tracking, analytics, push notifications, deep links, custom admin panel, install-based monetization, partner advertising workflows and payout verification.

PROFESSIONAL EXPERIENCE

Senior Software Engineer — Mystery Minds

2025 – Present

Munich, Germany (Remote)

Product platform for networking and mentoring inside organizations.

- Own senior-level feature delivery from business request and technical design to implementation, testing and production rollout.
- Built 50+ reusable frontend components and product foundations with Vue.js, Symfony, Symfony UX Live Components, Stimulus and PHP.
- Delivered workflows used across 100+ client organizations, including Excel import/export, dynamic email templates, reporting and admin tooling.
- Improved frontend performance, query response time and chunk loading for production interfaces.

Software Engineer — Mystery Minds

Jan 2022 – 2025

Munich, Germany (Remote)

- Built production features across Vue.js, Symfony, Symfony UX Live Components, Stimulus, PHP and MySQL.
- Delivered reporting interfaces, admin statistics, complex creators, filters, sorting, SSO-related flows, cron-jobs and production bug fixes.
- Grew into a trusted technical contact for Vue.js/Symfony implementation decisions and onboarding support.

Software Engineer — Permendo

Jul 2021 – Jan 2022

Langenfeld, Germany

- Built client-facing web applications from focused landing pages to SPA-style business tools.
- Delivered calendars, email workflows, authentication, tracking and business-specific features.
- Worked across Laravel, PHP, MySQL and Vue.js, covering both backend logic and UI delivery.

EARLIER EXPERIENCE

IT / Process Automation Intern — Ballsportdirekt

Aug 2020 – Feb 2021

Germany

- Built internal reporting and control tooling to reduce scanning mistakes and improve shipment reliability.
- Improved process visibility and operational accuracy across logistics and e-commerce workflows.

Working Student, Digitalization — Securitas

Apr 2019 – Nov 2019

Duesseldorf, Germany

- Analyzed throughput, bottlenecks and execution speed in document digitalization processes.
- Prepared reporting that helped management identify where execution needed reinforcement.

Frontend Developer Intern — Diana Candles

Jul 2016 – Aug 2016

Ventspils, Latvia

- Worked with a mentor on website development and maintenance.
- Built and maintained functionality with HTML, CSS, JavaScript, jQuery and database-related tasks.

EDUCATION

Hochschule Rhein-Waal

2016 – 2022

Communication & Information Engineering · Kamp-Lintfort, Germany

Relevant coursework: Distributed Systems, Software Engineering, Higher Mathematics, Graph Theory, OOP, Data Management, Data Analysis, Java and Mobile Development.

TECHNICAL SKILLS

Core stack: PHP, TypeScript, Laravel, Symfony, Vue.js, Node.js, JavaScript, MySQL, PostgreSQL, SQL

Product engineering: Data tables, reports, charts, filters, sorting, Excel import/export, dynamic email templates

Quality & tools: Git, PHPStan, Playwright, Vitest, OpenTelemetry, Postman, performance and query optimization

Additional: React, Java, Android Studio, C#

Frontend & UI: HTML, CSS, Stimulus, Symfony UX Live Components, Ionic

Backend & operations: REST APIs, business logic, cron-jobs, authentication, SSO flows, event-driven microservices

Infra: Docker, Kubernetes, Terraform, HashiCorp Vault, Helm, GH Actions, n8n, AI-assisted engineering
